Education

Bachelor of Science in Computer Science (BSCS)
Punjab University College of Information Technology (PUCIT)
2023 – 2027

Skills

- **Programming Languages:** C, C++, Java, Python, JavaScript, Kotlin
- **Web Technologies:** HTML, CSS, React, Next.js, Flask, FastAPI, Spring Boot
- **Databases:** SQL, NoSQL, PL/SQL, MongoDB, PostgreSQL, Supabase, Vector Databases
- **AI/ML:** LangChain, Supervised Learning, Unsupervised Learning, Scikit-learn
- **Data Science:** NumPy, Pandas, Matplotlib, Seaborn
- **Tools & Platforms:** Git, Figma, Canva, Jira, Postman
- **Problem Solving & Coding:** LeetCode (250+ problems solved), Competitive Programming

Experience

AI/ML Intern
UL Tech Hub
- Developed machine learning models for predictive analytics and AI-driven applications using Python and Scikit-learn.
- Built AI-powered applications by integrating Large Language Models (LLMs) with LangChain for intelligent automation and question-answering systems.
- Collaborated with the development team to optimize model performance, improve AI workflows, and deliver scalable AI solutions.

Teaching Assistant – Data Structures Lab
Punjab University College of Information Technology (PUCIT)
- Conducted lab sessions covering data structures, algorithms, and complexity analysis.
- Mentored students in implementing efficient solutions using C++ and helped improve their problem-solving skills.

Teaching Assistant – Object-Oriented Programming Lab
Punjab University College of Information Technology (PUCIT)
- Assisted students in understanding object-oriented programming concepts, debugging code, and completing lab assignments.
- Guided students in implementing projects using C++ and object-oriented design principles.

Projects

Talent Lens – AI Hiring Agent
Developed an AI-powered hiring platform using Agentic AI and LangChain that automates resume screening, candidate evaluation, interview scheduling, and AI-assisted interviews, streamlining the recruitment process.

ML Guru – Personalized AI Learning Coach
Built an AI-powered educational assistant using LangChain and Google Gemini that provides personalized learning guidance, explains machine learning concepts, answers technical questions, and generates quizzes and learning roadmaps.

Loan Prediction System using Machine Learning
Developed a machine learning model to predict loan approval using customer demographic and financial data. Performed data preprocessing, feature engineering, model training, and evaluation using Scikit-learn.

Pakistan Road Traffic Analysis (EDA)
Conducted exploratory data analysis on Pakistan road traffic accident data using Python, Pandas, Matplotlib, and Seaborn to identify accident trends, high-risk locations, and key road safety insights through data visualization.

Sports Registration System using Flask
Designed and developed a web-based sports event registration system using Flask, HTML, CSS, Bootstrap, and SQLite, enabling participant registration, event management, and secure data storage.
